

VBA Migration Guide

GstarCAD 2022

1. Code migration

- a) Open the dvb file in AutoCAD.
- b) Open the VBA editor (with "vbaide" command) in GstarCAD and create a new project.
- c) Copy all the contents of the dvb file to the VBA project which just has been created in GstarCAD.

2. Code modification

- a) Replace the COM object "Acad" which used in the AutoCAD with the corresponding COM object "Gcad" in GstarCAD. Such as replacing "AcadLine" with "GcadLine".
- b) Replace the object "Application" which used in the AutoCAD with the corresponding object "gcad.application" in GstarCAD.

Note:

VBA is only available in 32bits version of GstarCAD. Currently, 64bits version of GstarCAD can't support VBA.
